FEDERAL ATTORNET GALLS MeNAMARA PLUT MOST DAMNABLE EVER ENTERED INTO

Arrest of Prominent Labor Leaders Expected Hourly at Indianapolis—Los Angeles Politics in Turmoil.

Indianapolis, Ind., Dec. 4.— The confession of the McNamaras is only the beginning of the sensations in the dynamiting cases.

That was made clear today by United States District Attorney Charles W. Miller, in his first extended statement in regard to the federal probe into the dynamite

outrages.

Miller minced no words. He called the dynamite conspiracy in which the McNamaras were involved "nation-wide." He said that the people were entitled to know all the facts in the case, and that the people would know all the facts very shortly.

"The investigation of the government has revealed the most damnable plot ever entered into in this country," said Miller.

"The time has come when such unsafe leaders as President Gompers of the American Federation

of Labor must be retired.

"The destruction of life and property must cease. There must be a stop to acts of force and violence, and all violaters of the law must be brought to justice.

"Now is the time for such men as Frank P. Duffy, secretary of the International Association of Carpenters an Joiners, who stand on honest ground in the labor movement, to come to the lis acts."

There we have the standard of the list acts."

The standard of the list acts."

"There is no occasion for any person to be misled by false issues in this case.

"This is not a war between capital and labor. Capitalists and laborers must and will stand together in this thing."

FROM OTHER POINTS

From Cleveland and New York come messages confirming Miller's statement that the end is not yet.

Detective Burns, Captain Wascher, United States secret, service operative, and H. R. Brady, secretary of the local of the National Erectors' association, held an all morning conference at Cleveland.

At the end, a message was sent out from the offices of the Erectors' association. It was:

"Look for arrests in Cleveland at any hour."

In New York, Walter Drew, secretary of the National Erectors' association, said:

"There are between twenty and thirty union men over the country to be arrested for complicity, in the plot to destroy the Los Angeles Times and other structures.

"I know their names. They know that I know their names. There will be no further arrests until the grand jury at Indianapolis acts."

The most sinister development
